Introduction

This pack is ultimately about 'Golden Manifestation' and 'Functioning Truly In The Manifest World'. These two aspects are what these Energies are all about.

What is held within the Alchymie of these Energies is this awakening process to REAL MANIFESTATION, realising that we are not just born here, identified with the suffering of this realm, but that we are much greater! This awakening process is what the Alchymie is all about. It's awakening us to realise that we are alive as energy, that we are inherently 'breathed' but by the Divine Current and that we must understand we are an integral part of the whole. Every part of our body-minds must at last be released into the whole so that there is no cramp, there is just this Divine Communion of being.

As we awaken to understand this process whole-bodily, we learn to conduct the infinite current. This is the Eternal current of Real Life - the current that lives and breathes us beyond this life and death. This is called the 'Awakening To The Enlightened Form'. This is the remembering that we are much greater than what we appear to be in our born condition. The born bodily condition and form is simply an outer crustacean on Conscious Light. We put a lot of energy into that born condition as we have been taught to identify with it, to follow its desiring and to support it over and against everything and everyone else. That's what we are taught from the moment we are born here, because everyone else here has learned that same patterning process.

So to turn all of this around from this age of un-enlightenment, to the real awakening of whole-bodily enlightenment, requires us to begin a real process. That process is enlivening, is invigorating, is liberating and is ultimately total salvation from the suffering of the born condition. Therefore we learn to breathe, learn to be a conduit, learn to be part of the whole - seeing no separation, learning to be released in all of our centres - emotional, mental and bodily centres. This is a big process, but the real and total process of what we are here to do. So we make use of this life, we make use of its lessons and we grow into our real human capacity. We evolve, we awaken we become conduits of Divine Light. And in doing so we learn to become great MANIFESTERS!

The Hermetic Understanding of the Cosmology of Existence

The universe appears to us as a vast expanse, seemingly unending and unfathomable. In this view, stars are distant memories that reach back unimaginable millions of years. This vast cosmic display would seem to bring us down to a size less than that of an ant and many of us no doubt feel insignificant and ant-like relative to the cosmos. However, this imponderable universe is an illusion created through the structure of the human brain, and in penetrating this illusion we are able to see that the universe has no size at all. This is no doubt utter scientific heresy, yet let us say it again, "The universe has no size at all," and this is just like the 'place' where you dreamed last night, which also has no size at all.

The Stargate Box is a device that demonstrates the illusion of extension by being able to 'transmit' energy forms that are placed on the "I'm Here" side, to be received by placing a hand or a name or a photograph on the "I'm There" side of the Stargate Box. Hence, we can 'transmit' some Energy form from Sydney, Australia to New York, USA instantly simply by placing the person's name or photograph on the "I'm There" side in order to receive what has been placed on the "I'm Here" side.

The very existence of the Stargate Boxes demonstrates a cosmology very different from the cosmology of 'science' or the 'usual' person. The common scientific viewpoint still effectively believes that we are 'in a world' and the world is 'in a solar system' and this is 'in a galaxy' and the galaxy is 'in a system of galaxies' and so on and so on and so on, and all of this is 'in the universe'. The true cosmology that the Stargate Boxes demonstrate is that all this earthly vision is an illusion and this illusion is a modification of consciousness and as conscious beings all of this cosmos is arising 'within us' and 'as us' and 'not us' 'within it'. In this true view, consciousness has no extension and what appears to be an object is alive as consciousness and so in the 'awakened' condition absolutely everything about this 'vision' is known to the consciousness and as the consciousness in which it is arising.

The Energies

What is a Wizard Energy?

Some of the Energies in this Vial Pack have the world 'Wizard' on them. The inspiration for the Wizard Energie is indicated by their very name and this inspiration is the tradition, or body of knowledge, of some particular discipline. The reference to a given tradition is in the choosing of the highest aspect of that tradition, even beyond anything demonstrated by that tradition. That is, there can be no negatives in any Wizard Vial. The Vials are a present living creation and because of this, the Wizard Energies are interactive, as are all of the Alchymeic Products.

Direct Marketing Wizard

The essential aspect of The Direct Marketing Wizard is about abundance and thus gold coins are seen to rain from the sky as we align ourselves to the potentialities of what we offer and as we find more ways to deliver knowledge of our offering to the world at large. These revealed ways of communication are as homing pigeons that fly out, shine with their message and return home, allowing such a circuit to be full and to grant that this fullness rain a great abundance on us. These are the blessings of the goddess Lakshmi (Hindu goddess of fortune), for which we are eternally grateful.

Financial Management Wizard

The Financial Management Wizard is about purifying all the paper behind an astronomical number of transactions, even on a daily basis. When we put The Financial Management Wizard to some paper involving transactions in our own case, we can purify that transaction and all the trails it leads to, which is essentially everywhere in our own case. The paper of course appears in the form of checks, bills, actual currency and so on. Regular purification of this paper in our own case can open greater clarification, abundance and freedom from the complications of aspects that otherwise seem insurmountable and intractable. These insurmountables in our 'lives' may be seen to suddenly dissolve rather than to submit to some linear thinking solution.

Real Estate Wizard

We notice that paper is two dimensional, the Real Estate Wizard turns this paper into three dimensions, hence bringing what has been purified by the Financial Management Wizard into living form, thus if a purchase of a property is in progress, first The Financial Management Wizard purifies the transaction, then the Real Estate Wizard brings it into three dimensional form or into earthly vision.

Ultra-Tech Wizard

There is a Divine technology that is all-powerful and wonderfully exact as it removes the effects of the mad scientists and maybe even the boffins themselves through radical alteration of their stance. Technology is our grasp of the clever solutions to achieving some end. The Ultra-Tech is the most sophisticated way of achieving some end of classy means – no side effects and in perfect harmony with all that is. Utilising this know-how can aid us in our quest for some successful consequence to our activity that is the centre of our contemplation. Having difficulty with your DVD player, your coffee machine or your new remote control? Try holding Ultra-Tech Wizard - have a drink, relax the body and stress, and invite this Energy to help unlock the block.

Numerology Wizard

Even as the so called 'Noble savage' of some odd 100,000 years ago we still had a multitude of numbers associated with our unique 'human' condition, such as birth dates, known or unknown, height, weight, length of foot, number of hairs on head, where we lived in terms of longitude and latitude, our age, and so on. All of these numbers exist as a limitation, a restriction upon our living circumstance which keep us constrained to our unique destinies.

When we consider the situation as it pertains today, these numbers have multiplied like proverbial rabbits e.g. we now have license numbers of all kinds, telephone numbers, credit card numbers, numbers that flash at us out from the air each day, we listen to numbers, we are seeing numbers, there are numbers on bills, check, credit cards and all of this number fattening all but forces our breath out of the body. It is as though every inch of our skin is bar coded and these number constrictions can be seen to relate to our poor health and early demise. The

Numerology Wizard releases us from all this numerical bondage at all levels of the Earth vision, both Macro and Micro, giving us room to breath and at least some chance to discover a simple, natural ease of living. The Numerology Wizard employs all of the theory of modern mathematics, the integers, both positive and negative, fractions, infinite decimals, transcendental numbers, complex numbers and so on. We are purified across every possible number dimensions allowing us at last to enjoy the exercise of creative freedom of the One, Only God.

Management Wizard

We all have a massive array of things to 'hold' on a daily basis - some more than others... How we manage these things largely determines the amount of free energy we have in our lives left over for the 'important things' - like contemplating the process of Divine Awakening. Are we are good manager or a poor manager of our time and energy...? If only we could gain a bigger picture look at all everything and let go of the coping and stress. The Management Wizard invites Real Intelligence and Divine Grace into all that we are dealing with on a daily basis and invites us to yield our separative stance, allow such Grace to be felt more truly over time. May it be so!

Politics Of Experience Wizard

R.D. Laing opens his book, The Politics Of Experience with:

*"I like to have fun, getting you to have fun
is hard work, then I don't have fun."*

This is a somewhat amusing statement about a circumstance demonstrating unlove, in this case unresponsiveness and lack of enthusiasm. It is one of the many ways we seek to manipulate one another through bodily and verbal communication. There is no end to the possibilities of verbal manipulation through emotions involving innuendo, sardonic 'humour', polite subterfuge, vengeful intrigue and all the positive and negative fixations that amount to what in ancient times was referred to as the 'evil eye'. The 'evil eye' is seeing things in a positive light or a negative light, but failing to see the way anything actually is. The positive or negative light is merely our own shadow falling on all things and that upon which it falls is not permitted to be free, i.e. to be 'alive'. This Politics Of Experience Wizard Vial aligns us to true levels of communication with each other, which include right speech, right thinking, right action delivering us from all levels of reaction formation wherein we hide our true 'feelings' behind Trojan horses. Our true form of

communication is beyond all political manipulation and at last is simply the Heart shining through the whole bodily form and we stand forth as a Presence of perfect integrity or the perfect integrity of the Open-Face, Open-Hand and Open-Heart and all our pathetic psychologies are consigned to a waste land where they belong.

Invention Wizard

It's that blinding moment of brilliance, that incredible idea that comes, when you are just standing in the shower...! True inspiration is simply 'given', beyond all the coping and stress of the usual point-of-view of mind. Mindless embodiment is when everything simply arrives.

Phone Talk

Work with this Energy when spending time on the telephone. It carries a profound force of psychic purification which helps us cut through all communications and negative energies we encounter, even over the phone.

Hearts Aflame

The Alchymeic energy known as Hearts Aflame has been created to allow the passion and fire of our desiring to manifest. This Hermetic current is to ignite and inspire change, to awaken the Heart to remembrance and to allow the feeling level of existence to be known and lived, thus lifting all to a new level of consciousness. There is an urgency to create Hearts of Space throughout the world at a critical time in human history. Our Heart's desire is that they spread like wildfire. May there yet be time to turn this crisis about...

Goodbye Electro-Magnetics

There is a background hum to our houses of 50 cycle electro-magnetics and the communications from the so-called user-friendly computer are worse than our toaster. We are subject to varying degrees of electromagnetic disturbance no matter where we go these days. May it be transformed, into something like a picnic, with buttercups, by a stream, after a rainstorm.

Wildfire Spins The Gold - Arr 377

Gold incarnating Liquid Light! The current of this wondrous Alchymeic Energy is the invocation of liquid gold - the liquid Light of the Divine current from infinitely above. It allows that Light to be brought through the energy circuitry of our form,

unblocking the circuitry so that the whole-bodily form becomes a conduit of this liquid Light current. The golden threads begin to actualise and be made manifest, beginning to solidify into manifestation.

This current is for one who is yielded to the Divine, made free agency of the conductivity without any blocks. In order to be a real manifestor one cannot be locked into self-concern and self-meditation. We must be yielded and 'given over' allowing that conductivity to be a blessing and a gift for the sake of all! The more we learn to let go of the fear of separation and the need to protect the self, the more we conduct the current of real manifestation. It is a process of awakening and shifting the bodily circuitry to allow the Liquid gold of the enlightened form and current of real manifestation. So Be It!

Money Tree

Worrying about anything is not helpful. The disposition of worrying is a meditation on a negative condition, tending therefore to bring about the negative condition. Trying to get positive is also meditation on the negative and does little to ameliorate the money worry. What is this money that we are worried about? Clearly it's not money or it wouldn't be a worry. It's the absence of money that is the worry. Money itself is a symbol of life exchange, i.e. exchange of 'life energy'. If there is not sufficient to go around it is largely because we are not 'conducting' the lifeforce and so we represent a poverty of 'energy' that is reflected in our 'broken piggy bank'.

Of course there is a huge number of apparent 'slobs' who are wealthy beyond our wildest dreams. How this has come about is a mysterious consequence of karmic tendencies set in motion in past ages. Instead of looking upon these rich folks with obvious envy, it should be considered that wealth is most often a hindrance to real spiritual development, since being wealthy enables us to hide from many 'testing' circumstances. 'Winners are gridders' no doubt, but are the 'winners' ultimately happy because of their wealth? It is true we do need sufficient funds in our Western society to maintain ourselves beyond the 'poverty line'. This level of abundance could easily be granted by simply exploring the responsibility for conductivity of the life force wherein the karmas of poverty could be forever dissolved.

The Money Worries vial dissolves our negative disposition wherein we are simply complaining about our dreadful situation and begin to help us 'count our blessings' and in so doing heals the disposition that has created our negative circumstance.

Shadow Of The World Wide Web - Arr 253

The Shadow Of The World Wide Web eliminates the dark mind of scientific technology that encases the world in a choking and tightening web of ignorance and arrogance which also suffers from a vast alien intrusion and every kind of evil out of Pandora's Box.

This especially refers to the world of computer technology and this cyber space world that arises out of this errant child of Man's imagination. Therefore The Shadow Of The World Wide Web psychically protects us from all manner of energetic harm that we invite through our connections to cyberspace and this cyberspace also includes television, all written material i.e. works of fiction and non-fiction and every level of ordinary communication and so it is when we 'ordinarily' speak to one another in 'ordinary' terms without the intimacy of Divine inspiration we only interact in a kind of cyberspace, where nothing has the substantiation of this ordinary Earth realm. Living in this way we drift away in the thought bubbles above our heads. The Shadow Of The World Wide Web sticker and water is a big pin that releases us from blithe journeys in mysterious places, locked in our dreamy space bubble.

Travel Wizard

Travel has become a major part of our lives, particularly for work situations - sometimes very long distances. But there are many difficult aspects to travel that we need help to eliminate - various energetic psychic pressures as well as stress on the entire form. This wonderful Alchymeic Energy encompasses all aspects of energetic support for all those travelling, whether it be for work or leisure.

Taxation Wizard

A Divine blessing current to clear and align all things relating to taxation - helping to purify all stress and overwhelm, granting the Consciousness to penetrate all matters to do with tax.

Legal Wizard

There is only one law - the Divine Law! This Energy aligned everything with the Divine Law, or the law of sacrifice. Ultimately, everything must be yielded - everything must be aligned to that Truth. So be it!

Editorial Wizard

This Alchymeic Energy is a wonderful tool for helping us with all aspects related to writing and work with literature. It also helps inspire higher thought and insight when working on ideas and creative projects.

Signs & Portents

Awakening to feeling and seeing the movement of the Divine into the world and being drawn truly to witness this movement in your own life. When added to the other vials, Signs and Portents helps us to see what the vials truly are, the Touch of the Divine.

Spectrum Speak

This Energy helps with learning one's own language and new languages and improving communication skills. Expands the range of sounds that we are able to utter. It may also help in bringing forward past life or sub-conscious connections with a language.

Tell Me All

There are things about the living circumstance that are hidden, not because of ordinary forgetfulness, but hidden behind a veil of obscurity. This Energy opens our extra senses to discover aspects of our condition that could be useful. Hold this Energy and ask the question, allow the outcome to be revealed through Divine Grace. Any sort of question... give it a go!

Quantum Manifestation

This energy aids us in serving the flow of the product into the world, part of which is the 'survival' of those who serve Infinity, and not merely 'survival' but the provision of conscious serving environments, wherein all beings may flourish, not just human beings but rock beings, plant beings and so on. Quantum Manifestation helps to remove several constricting conditions from us that prevent us from seeing beyond our conventional life struggle, thus lifting us beyond our karmas, particularly negative karmas.

Quantum Utility Fog

Solidifies the vision of what is required in Quantum Manifestation, bringing it into reality. Thus the vision is made solid.

Central Coagulating Activity

Spirit current formed into substance – the coagulating factor ϕ . Original schism – the one becomes two – everything defines and is part of unity.

ϕ – golden number – is a mystical number, doesn't have a mathematical equivalent. ϕ is an esoteric abstraction, arithmetical matters are a result of action of ϕ . ϕ is generated, creates the original schism, one is on its way to two, no objectifiable nature – can't be reduced to any quantification.

Egyptian pharaonics - Esoteric Symbolique - Reality Feeling

Everything to Egypt was geometric. Greeks sold us out through sillagystic logic (expedient) – exoteric, objective rational degeneration of Reason. Despair occurs when Spirit substance is made into form (analogue: getting to cry is shaped like a sea horse). Effect: brings everything into concentration (from dispersion).

Real Observation

Since there is Only God, in Real Observation we see the 'world' is simply our own 'radiance' and therefore what we see is not separate from us. What is usually referred to as observation is an emotional dissociated activity of viewing the 'world' from a 'perspective' of the 'mind'. Such observation has no more transforming power than a visit to the cinema could transform the content of the movie. Getting the 'right' perspective on things is about as boring as watching flies crawl up a wall, yet this is all that occurs in the ordinary event of the ordinary life, merely 'self', 'other' and 'world' watching. In this usual mode we are totally ineffectual relative to 'self', 'other' and 'world', we are merely the helpless sufferer of 'self', 'other' and 'world'.

Real observation dissolves the separative activity of creating perspectives. The 'event' that transforms us from ordinary observation to Real observation is a transformation in consciousness wherein we are alive as the 'total pattern of all relations', which include without ultimate differentiation the

body-mind self. In Real observation therefore we always see the 'self' activity as part of the total pattern, we see our absurd 'selves' acting absurdly. In ordinary observation "there is none so blind as those who cannot see", which is a statement that completely describes the obfuscation of ordinary observation. Real observation is being alive as the Mystery, as Real intelligence and that intelligence is inclusively transforming of the entire domain of our existence. As a vial this energy draws us out of destiny of our prospective into the true creative freedom of our Real life as destiny in Only God.

Glastron Adaptation

There is an actual product called 'Glastron', which is a machine that can be strapped over our eyes and ears giving us an intense sensory experience while watching a DVD movie. It takes an evolutionary adaptation to not get 'programmed' or lost in the cyber world when engaging this machine. Inspired by this equipment, the Glastron Vial is inviting an adaptation and capacity to be greater than machinery and other forms of virtual reality. In our use of computers and the like we need to be the conscious presence animating creative control.

The Arranging Energies

Arranging 192

We all enjoy being able to vacuum dust off the floor and the like, but what if we could vacuum the soul, the corners of the mind where little notions are hiding, what if we could vacuum all kinds of 'Wrong thinking Harry'? What if we could vacuum the circumstance of the day away, as if it never was. Try it... the Quantum Vacuum.

Arranging 186

The human race suffers from an extreme over-intrusiveness by presences that have commonly and fashionably come to be known as 'alien'. The common forms of manipulation are things like 'implants', genetic alterations and many forms of programming in a myriad aspects of daily environmental interactions, such as T.V., films, billboards, food, etc. Lifestream addresses this level of energetic intrusion.

Arranging 185 - No Law For Negativity

There is no doubt that over the last few thousand years the continued investment in being less than Love has degraded this 'place' to what we find today. Beyond what can be seen in the ordinary sense, when the Vision of God is not present, psychically this 'place' appears as a vast and poisonous spider web. This energy moves to penetrate and dissolve the many forms of negative communication, providing auric-field protection, restoring us to the 'bigger vision'.

Arranging 31

Vision of Function Power: The Neter

The inside becomes the outside. Networks awaken deep within the brain and to the surface, activation of an evolutionary current. Expanding Consciousness. Three dimensional, opening the passageways. Brain felt to be opening from fixity.

Arranging 33

Vision of Genetic Function in Itself:

The Creative current witnessed to be so great now that the impulse to generate or create overwhelms all resistance. This Divine urge takes nothing into account. It can be seen as a highway of Current and forces the map or bits of programmes or DNA messages to spread. In the vision it doesn't appear to mind errors. In other words, it is indiscriminate. The Force of Creation is simply that - An unaccountable Force. It tolerates mistakes. The Original Genesis, this Force ultimately through the cycle of life - death and change returns to Itself.

Nothing is separate in the Configuration, the quality expands infinitely above and in the Arranging the current of creative impulse enters the head and includes that which is below. 'As Above So Below'.

Arranging 35

The vision of Theo-Genesis: Creation is continuous and simultaneous. Creative Ball thrown to me - Genesis is the Creative Force, which is continuous.

The vision reveals that Creation is continuous and simultaneous. It is a continual current of the Life-Force allowing Genesis or Creation. It is an all at Onceness. In the configuring of this Energy - The Divine Fire was allowing a great movement forward, allowing the Creative Current to move more freely out of the subtle into the gross-physical.

It appeared in the vision to enter through the top of the head moving down into the navel. The vision in the Arranging could be seen exploding through the frontal line (frontal personality) and allowing the birthing of the Divine incarnating personality – An unstoppable creative force pushing through all resistance and forcing the overwhelming of the ‘knot of fear’ of the ‘frontal persona’, which is Awakening to Simultaneity or all at Onceness.

Arranging 43

The RR Qualitative Evolution energy can be seen in the witness as following the expansion of Consciousness and following the expansion or growth of the Brain Mind or the Extended Brain. This current relates then to the lifting out of the cramp or contraction of the brain mind, bringing about a liberation of Doubt. Qualitative Evolution is growing a Cosmic Brain, which ultimately is the evolutionary blueprint inherent within every born being. So as this Energy then is configured there is a shooting of the concentration of energy to a higher plateau. A shrill of higher vibration could be heard as the current becomes volumetric. The hole above the head is seen to open and allow the current of Divine incarnating force to enter. Whilst witnessing the movement then to the Arrangingment, a Large white dome in top of the Hole could be seen, filled with white Light.

Arranging 47

This energy Vital Synthesis - Pure Symbol in its witnessing reveals the shape shifting of Divine Current. I was given the shape of Angels appearing, presently being created as a shape. The moment was continuous creation without fixity - The living creative shape, the electrifying manifestation of the current as shape. In the configuration, the strength of the creative current appeared unstoppable and could be seen as falling like rain.

Arranging 48

In witnessing ‘Action Synthesis - Pseudosymbol’, the body appears in the lotus position, then the lighted pattern or circulatory network appears – revealed to be more important than the outer cover - outer cover insignificant. Divine pattern, points of Light or Divine architectural plan for Universe and forms, effect of using this as a cause, i.e. using as an energy. Effect: Restimulation of the inherent Divine Pattern to remind the form of Divine plan, to Stimulate Enlightened Form.

Arranging 49

In witnessing ‘Synthesising Effect of Thought - Parasymbol’ everything was brought into a plane of thought, swirling colour (volume) liquid shining, presently creating the living process. Synthesising effect of thought can advance manifestation of thought.

Arranging 53

‘The Verb in Action’ is seen as the will of motion, the inside intelligence of motion – apparent in the action or gesture – imminence of motion – imminence (the inside impulse of imbuelement of action). Seeing from the inside out - esoteric – True Vision. Force in action, movement is one-pointed, nothing is taken into account, forceful.

Vision: Horse charging towards me (God needs no excuses, no apology). At last Love takes nothing into account (the Law of Creation).

Arranging 68

The Magic of Analogies - like voodoo dolls. Parting of the Red Sea, opening the earth. Creating an image of what you require and working on it (create the perfect symbol).

Arranging 111

The Philosophy of Number. Everything is done through sound or vibration. Different numbers create different sounds, harmonious pitch creates a different thing, number machine appeared in vision - Creation itself - not of this world. Effect: Allowis the being to come alive as the Current, not as fixity - mantras, Om etc. Felt body opening and living.

Arranging 112

The Functional Character of Number. Like a Rainbow of Sounds everything awakens as a vibration of current. Effect: opens up the Feeling Being, the Feeling Being in all its capacities, mind opens, body opens.

Arranging 134

Action of Fi - Light fractiates into own Radiance. Light is fraction of unity, of the One. All is our own radiance. First Scission of One becoming Two. All the fractions create things. Creation - Creation is the Light - Transcendental Water - Light Fractiated into all the other things of Creation.

Arranging 137

Action of Fi + 1 - (Concentration) - Geometrical Representations
- All Energy comes into first point - Seat of Consciousness. (Phi is a mystical number, represents (symbol) 5 - Being the mystical Concentration -> Gram)

Arranging 138

Action of F - 1 - (Dispersal) - Dispersion from Heart Centre in four directions.

Arranging 139

Genesis of Fi + 1 - Active concentration of Current of Creative Force felt in the Base centre (creative centre (creative centre: Hara). The force is seen and felt as a Genesis of bubbling up balls, all balls appear to hold different creative possibilities or species. Bubbling current - (Creative Energy)

Arranging 148

The Verb Acting in God.

Vision: Omnipresent Form appeared - shape but no definition - held within it was the current of pulse that worked the world, was the action as though the blood and muscles created the Current of Life. Effect: Felt as a current entering the body particularly through the blood pulsing as action. Current - Movement - Action.

Arranging 295

Money itself is a symbol of life exchange, i.e. exchange of 'life energy'. If there is not sufficient to go around it is largely because we are not 'conducting' the life-force and so we represent a poverty of 'energy' that is reflected in our 'broken piggy bank'. This energy moves to awaken us to the Manifesting Current. Who wouldn't want a money tree?

The Delta T Series

The Delta Series is given to help us open more fully to the Manifesting current. They move powerfully, deeply releasing many knots and blocks to the flow of life-force in our forms.

Delta () T 1-11

The progression of building blocks. These structures are part of the prima materia for the Alchymist to be able to enter the mortal form or hellish realms. The basic building blocks to begin to allow the formation of the

Delta T1 ()

Vision: The blue flames of Alchymeic fire could be seen initiating the transformative process of metal to gold. Hence the basic block of the Alchymeic process of transformation.

Delta T2 ()

Vision: The increased intensity of fire, within it revealed two crossed swords pointed downwards. The intensity of the fire sufficient to begin the turning process of the swords to the upright position. Hence the beginnings of the transformation of mind within the Alchymeic process.

Delta T3 ()

Vision: The sunlight above was felt and seen as a force of fire burning from above. Everything below dissolving in the sheer heat - hence the Alchymeic current of the Divine entering from above.

Delta T4 ()

Vision: The literal smell of chemical burn permeated the field as a shining new surface appeared within the fire - hence the transitioning process.

Delta T5 ()

Vision: The emergence of the shaped form, under extreme conditions of heat, pressure and light, is beginning to take hold. Hence the beginnings

Delta T6 ()

Vision: An opening hole began to appear in the centre, it was felt and known as the heart's centre. Hence the Alchymeic transformation of Love

Delta T7 ()

Vision: Deep below the surface, beyond time and space, the core of primitivism being touched and released from the earth plane itself. Hence the Alchymeic process of movement beyond the mortal form to the eternal

Delta T8 ()

Vision: Within the fire new chains of linkage appeared, new strands of DNA beginning to be formed. The enlightened form beginning to be

Delta T9 ()

Vision: The teardrops of the Divine could be felt and seen filling the form and allowing creation. Hence the combining process at a cellular level allowing the enlightened form, the transfiguring process. The Radiance of the Divine is known and seen in the transfigured

Delta T10 ()

Seen as the Alchymeic process of nourishment, the Divine Gifts stirring with the blood or life force of the form. Hence the process of conductivity brings with it the combining of Divine nourishment at a cellular level. A profound matter of intimacy.

Delta T11 ()

The Alchymeic process of allowing the letting go, the dissolution of separative self. Moving beyond fear to the bliss of non-separation.

Additional Articles

The following readings are included to help allow a greater depth of understanding and contemplation when engaging and working with your Pack.

Writing Prayers on the Stargate Box

Conventional Prayer

"So what is prayer? Well conventionally a prayer is asking the Divine for some change in a circumstance that is most often emotionally charged with importance for those who pray. Often this importance is the avoidance of some impending disaster and usually it is the 'portents of doom', which have turned an individual toward thoughts of seeking Divine help, where ordinarily, consideration of the Divine is not entertained. Such a circumstance could be termed 'neurotic prayer' and such prayer would account for most of what praying amounts to..." (From "The Will of God Is The Obligation To Love" by Jessa O' My Heart)

"What the conventional person is always doing is seeing from the point of view of the self. So they are always essentially judging other people but they don't see themselves. In real observation, real intelligence, you see the self as the total pattern of relations, within the total pattern of relations. So you're not making judgments from that point of view, you are simply seeing the way that it is, including the absurdity of yourself." (Jessa O' My Heart - Dec. 31st 1998)

Real Prayer

Real prayer is whole body sacrifice into the total pattern of every moment. We are yielded and surrendered beyond the knowing or presumption of the outcome or the means to the outcome. We have turned it all over to the hands of God, we are submitting to grace. Whole bodily is to say we yield up the whole body and all possible motivations within the cosmos.

Definition of words in italics above: Whole bodily: our multidimensional structure that coincides with the cosmos. Sacrifice: yielding up the pattern of desires and all seeking, until there is nothing we are clinging to, high or low.
